Introduction

Integrate PaySecure to start accepting payment online

Overview

Welcome to PaySecure API - a fast, secure, and developer friendly way to accept payment for your web or mobile application.

Payment Options

1. Online:

   - Create a checkout page with PaySecure.
   - Embed a custom payment form on website or application.
   - Accept payment without code.

2. Subscription:

   - Set up a subscription with trial period or billing cycle.
   - Send invoices on a recurring schedule.
   - Change the billing cycle, price, apply discounts, and maore.

Start Building

You can build different platforms and marketplaces, web and mobile apps and integrate PaySecure api to collect payments.

For example:

1. Ecommerce marketplaces
2. Online stores
3. Create a SaaS platform

The above are just a few examples. You can build anything with PaySecure.
